MTEE engine stock

4. Parts

We only sell **genuine** Mitsubishi and **genuine** Isuzu parts. We supply engines and parts from stock the same day.

DET spare parts stock of 6000 part numbers

DET engine stock DET (> 100 pcs)

To guarantee high level of service we need to have all common parts in stock, because of this, short delivery times are possible. We keep parts on stock of the current Mitsubishi diesel engine series like the; L, SL, SQ and SS and also of the well known SR series and SU parts are in stock.

Besides Mitsubishi and Isuzu we have Japanese parts experience for more than 20 years. We supply Mitsubishi and Isuzu diesel engine parts.

The Parts team at DET consists of five highly experienced employees who can be contacted directly by phone, e-mail or Skype.

DET is positioned like no other to offer its customers short term delivery service. Key to this success is the large amount of stock kept. For diesel engines DET often has fixed packages of parts available, so that orders can be processed and shipped quickly. This way DET can have an order ready for shipment within an hour. In close cooperation with international forwarders, like FedEx, DPD, TNT orders are shipped the same day and delivered at your premises within 24 hours (depending on your location).

Documentation, web access to Mitsubishi Heavy Industries (MHI) and Isuzu.

DET has an unprecedented collection of Mitsubishi and Isuzu catalogues. Our employees use these on a regular basis as it enables them to help our customers with even the most specific questions. Often just the engine specification and serial number of a diesel engine or gen set is enough for us to establish which part the customer is referring to and which replacement parts are necessary. Next to documentation in the form of catalogues we also get a lot of our information from contact with several original equipment manufacturers, our own network. We have direct access to the service and spare parts web system of MHI and also direct access to the Isuzu service and spare parts web system.

5. Service

DET distinguishes itself through excellent service. Support goes beyond contact by phone and email, DET specialists commonly visit customers at their premises. Also DET provides training for new customers at their premises.

Our services engineers are: Certified Common Rail Diagnostic Services engineers by Isuzu Motors.
